** The order OA3, OA4, OA6, and OA7 are all listed as separate units because feedback did not indicate a desire to change this. However, we feel all of these work hand-in-hand for students to understand basic addition and subtraction and to be able to fluently use strategies and operations to add and subtract within 20. So, as one unit ends, those standards are actually still supporting each other for the entirety of Units 5-8. These standards all work together and this could be considered one big unit that progresses through these standards.
